

Instrument Roadmap - Discussion

- Upgrades – pro-con?
 - Are the upgrades scientifically exciting or should we focus efforts on new instruments?

Upgrades are useful if timely and not too disruptive

- Will they excite a SR panel?
- Time-lines
 - Is the shorter turn-around for an upgrade a good trade?
 - What is the longest “off-line” an upgrade is worth?
- Field rotators – required for all/some instruments?

A facility field-rotator would be a boon for e.g. slit spectroscopy
