Splinter Groups Thoughts

• What key science is missing from white papers?

• What key science would we not want to miss before the end of the mission?

• Which science modes (e.g. survey, targeted, synoptic) are more productive for your science?

• Can you converge on a straw-person program with a rough priority ranking?

• Which are the critical supporting data and where will you get them?

• What is the best way to support your science?

Splinter Groups

• Solar Systems   (Emery)

  SS, Exoplanets, Small Bodies

• Our Galaxy (Burgasser)

  Galactic Structure, Star Formation, Stellar Astrophysics

• Nearby Universe (van Zee)

  Local Group, Galaxies to $z < 0.5$, AGN, ULIRGs

• Distant Universe (Stanford)

  Galaxies at $z > 0.5$, Cosmology, Cluster, etc.
